

Homepage

Welcome to Pegasos Capital. We are a Munich-based financial services provider with a focus on asset allocation, i.e. the allocation of assets among different asset classes such as bonds, stocks, commodities, real estate and market-neutral products. Our core competency lies in providing conscientious and responsible financial advice, and managing the assets of sophisticated investors.

Depending on the amount of liquid assets, a number of different products and services are available. From 1,000 Euros onwards, investors can cost-effectively invest in our mutual fund. For private clients with liquid assets of more than 250,000 Euros, we offer customised portfolio management services. For private clients and institutional investors with liquid assets of more 5,000,000 Euros, we can create and manage tailor-made funds.

Most people do not have the time or the interest to deal intensively with the investment of their personal assets. The result is a sub-optimal asset structure and an unsatisfactory investment performance, i.e. low returns and/or excessive risks.

Our product and services offer an ideal solution for this problem. You trust us with a part of your assets, and we take care of the rest. Your advantage: you can benefit from a professional and, above all, independent investment management, and don't need to be concerned about investing your assets any longer. Very important for you: you are the owner of your assets at any time and don't need to worry about the safety and availability of your assets.

On the following pages you will find an overview of our company, our product and service offering, and our investment philosophy:

Our company

Here you can find a summary of our company, our management, the benefits of working with us, and some background info on our name.
